# FITUR DAN ANALISIS REQUIREMENT

- 01 Validasi fitur "Buat Akun?"
- 02 Validasi fitur "Login"
- 03 Validasi fungsi button "Create Ticket"
- 04 Validasi fitur "Submit Ticket"

The screenshot shows a GitHub repository interface. The repository name is 'Resonance-Website-Project-Final-Project-QA.Dibimbng'. The main page displays a file titled 'Pemilihan Fitur & Analisis Requirement'. The content of the file is as follows:

```
1 Pemilihan Fitur & Analisis Requirement
2 Fitur yang diuji:
3 Validasi fitur "Buat Akun?" -- Penting melakukan testing pada fitur registrasi agar user dapat masuk dengan mudah. Gagal buat akun, user tidak bisa create ticket, maka website tidak berfungsi.
4 Validasi fitur "Login" dengan akun yang sudah terdaftar -- Penting untuk menguji, data username dan password yang diregistrasikan berhasil diproses pada halaman login.
5 Validasi fungsi button "Create Ticket" -- Part crucial, karena merupakan pintu utama menuju submit ticket, sebelum bisa masuk ke halaman submit tiket, jika gagal create tiket maka website tidak berfungsi sesuai tujuan pembuatan.
6 Validasi fitur "Submit Ticket" -- Part crucial, semua kendala user dideskripsikan pada halaman submit ticket, dan halaman ini memuat beberapa fitur lain, seperti "form describe your needs" dan "upload image". Jika, user gagal menginput pada salah satu bagian maka, user tidak akan bisa lanjut untuk submit ticket
```

At the bottom right of the file view, there is a large green button labeled 'LINK GITHUB'.
